

NTWALI MUTAONA Samuel

Phone: +243 975241918

Email: samuel.ntwali@unikin.ac.cd

ntwalisam.mut@gmail.com

Website: www.ntwalisam.com

Github: github.com/NTWALISam

Address: KINSHASA/DR Congo

RESEARCH INTERESTS

- Artificial Intelligence, Data Science and Machine Learning applied to electric power systems and renewable energy.
- High Voltage, Medium Voltage and Low Voltage electrical networks and Smart Grids. .
- Power electronics, industrial automation and Internet of Things. .

EDUCATION

Diploma of Engineer (Bac+5, Engineering Degree) — *Electrical Engineering* October 2021 – March 2025
University of Kinshasa Kinshasa, Congo DR

Bachelor of Science — *Electrical Engineering* October 2016 – July 2021
University of Kinshasa Kinshasa, Congo DR

PROJECTS AND RESEARCH

Fault Detection and Localization in Photovoltaic Systems Using Extreme Learning Machine: Handling Short Circuits and Partial Shading — *Bac+5 Research*
University of Kinshasa /July, 2024 – February 2025

Design and Implementation of a Small-Scale Flow Measurement System for Small Rivers Based on the Sodium Chloride (NaCl) Dilution Principle. — *Freelance Research project*
University of Kinshasa /July, 2024 – February 2025

Designed and built an autonomous electrical system connected to a mobile application that indicates the quantity of water contained in a domestic tank. — *Bachelor Thesis*
University of Kinshasa /April, 2021 – Jun 2021

PAPERS AND CONFERENCES

Fault Detection and Localization in Photovoltaic Systems Using Extreme Learning Machine: Handling Short Circuits and Partial Shading —28 September – 02 October 2025
in Proceedings of the 2025 IEEE PES/IAS PowerAfrica Conference, IEEE, Cairo, Egypt.
DOI:10.1109/powerafrica65840.2025.11289060

Detection and Classification of Shading and Short-Circuit Faults in a Photovoltaic System Using SVM, DT, and RF with Principal Component Analysis —28 September – 02 October 2025
in Proceedings of the 2025 IEEE PES/IAS PowerAfrica Conference, IEEE, Cairo, Egypt.
DOI:10.1109/powerafrica65840.2025.11289128

Fault Detection and Localization in Electrical Transmission Lines Using ELM and LSTM Networks Based on MATLAB/Simulink Modeling and Simulation —28 September – 02 October 2025
in Proceedings of the 2025 IEEE PES/IAS PowerAfrica Conference, IEEE, Cairo, Egypt.
DOI:10.1109/powerafrica65840.2025.11289064

WORK EXPERIENCE

Assistant Lecturer	started in february 2026
University of Kinshasa	Kinshasa, Congo DR
• Lecturing, Student suspension and Research	
Project Engineer	since september 2025 –
Africa Development System (ADS)	Kinshasa , Congo DR
• Design and Analysis of HV, MV and LV networks, substations, Photovoltaic Power Plants and Rural electrification projects.	

HONORS AND AWARDS

One of the laureates of the STEM DRC Scholarship, 2020 Edition . <https://www.stemdrc.com/copy-of-lauréats-2021>

COMMUNITY INVOLVEMENT

Honorary member of the Electrical Engineering and Computer Science Club of the Faculty of Engineering, University of Kinshasa	Kinshasa, Congo DR — Since july 2021
Sourions Ensemble Goma Charity Organization	Congo DR— Since 2023

SKILLS

Languages: English, French (Native), Swahili and Lingala.

Programming: Python (Pandas,scikit-learn, TensorFlow, Keras), C, C++, MATLAB, C#, Java,Dart and HTML/CSS

Document Tools: L^AT_EX, Microsoft Office Suite
